

UNIVERSITY OF MADRAS

B.Sc. DEGREE PROGRAMME IN COMPUTER SCIENCE

SYLLABUS WITH EFFECT FROM 2023-2024

Year: I

Semester: II

Introduction to Computer Architecture and Microprocessor Practical		125C21
Credits 5	Lecture Hours:5 per week	
<p>Learning Objectives: (for teachers: what they have to do in the class/lab/field)</p> <ul style="list-style-type: none">• To introduce the internal organization of Intel 8085 Microprocessor.• To enable the students to write assembly language programs using 8085.• To interface the peripheral devices to 8085 using Interrupt controller and DMA interface.• To provide real-life applications using microcontroller.		
<p>Course Outcomes: (for students: To know what they are going to learn)</p> <p>CO1: Remember the Basic binary codes and their conversions. Binary concepts are used in Microprocessor programming and provide a good understanding of the architecture of 8085.</p> <p>CO2: Understanding the 8085-instruction set and their classifications, enables the students to write the programs easily on their own using different logic.</p> <p>CO3: Applying different types of instructions to convert binary codes and analysing the outcome. The instruction set is applied to develop programs on multibyte arithmetic operations.</p> <p>CO4: Analyse how peripheral devices are connected to 8085 using Interrupts and DMA controller.</p>
